Pavimenti Sartoriali

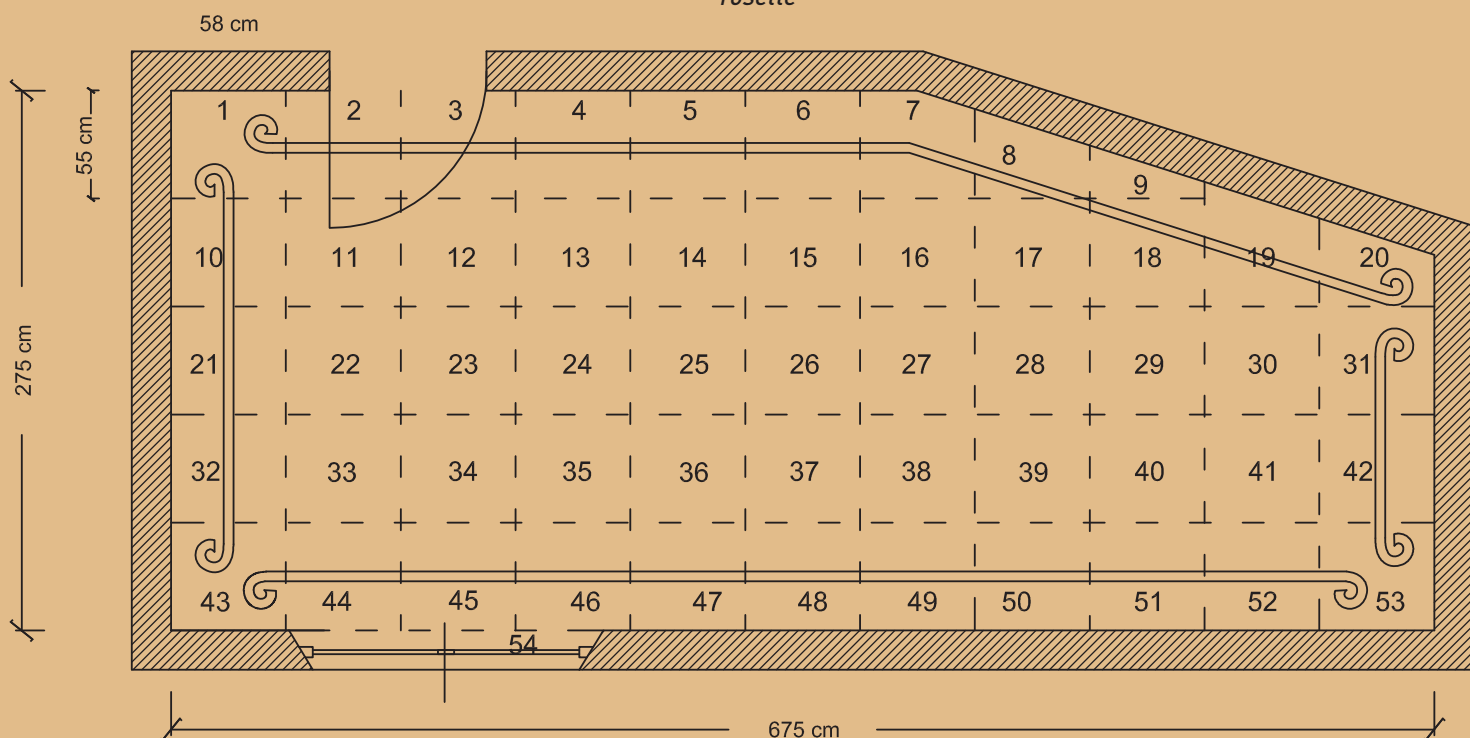

Il pavimento della manifattura sartoriale è costituito da lastre di disegno progettate, calcolate e proporzionate per il locale che si deve pavimentare. Le lastre combaceranno perfettamente con la geometria del locale, considerando le aperture, i fuori squadra, le strombature e tutte le altre particolari geometrie che un ambiente può presentare; in tal modo si otterrà un ottimo risultato estetico. La posa del pavimento sartoriale è guidata da un disegno fornito dalla Grandinetti, che indica la numerazione di ogni singolo elemento di composizione (vedi esempio pagina accanto in basso). Non trattandosi di formati standard, ma di lastre dedicate, non si avrà necessità di tagli nella posa in opera.

The "pavimenti sartoriali" floor comprises modules that were designed and calculated for the room in question. The modules will combine perfectly with the shape of the room. In this way, an aesthetic result will be achieved by the proportion of all the modules. Moreover, no cuts will be made. Installation is guided by a drawing supplied with the floor which shows the numbering of each single piece.

COMPOSIZIONE E NOMENCLATURA DEI MOTIVI DECORATIVI DI UN PAVIMENTO SARTORIALE "TIPO"
