## WARNING

**For a correct application, the support must have a perfectly smooth, even and white surface, and must be mature, dry, sound and stable. Before the application, all materials should be stored in a dry place, sheltered from rain and humidity. For information on use with fibreglass or steel swimming pools, contact Bisazza's technical office (installation.department@bisazza.com).**

**Always follow the instructions reported in the technical sheets.**

**Fillgel plus 1101 bianco alabastro and 1104 neutro base are not suitable for pools or external applications. In case of use of transparent or semi-transparent mosaic (VTC 20.09 and Opera 25 series) in pools or high humidity areas (showers, steam rooms, etc.) we recommend Bisazza Epoxy Installation kit (eGlue + Fillgel Plus UVR) or similar epoxy products.**

### MAINTENANCE AND CLEANING OF GLASS MOSAIC SURFACES

Use ordinary cleaning products for maintenance and cleaning of glass mosaic surfaces (except those containing hydrofluoric acid or phosphoric acid), being careful to rinse thoroughly with water. Alkaline detergents should be used carefully and rapidly rinsed out with water. Any cleaning product should not be used on heated or directly exposed to sunrays surfaces. Avoid using abrasive tools and high pressure jets of water.
