PROVEX

comfort in the bathroom

Frutto di diverse culture, caratterizzati da esperienza e costante impegno nella ricerca di originalità, il nostro impegno è rivolto al benessere nel bagno.

Aus dem Nährboden verschiedener Kulturen entstanden, durch Erfahrung und dem ständigen Streben nach Besonderem geprägt, richten sich unsere Gedanken und Ideen auf das Wohlbefinden im Bad.

From the fertile soil of different cultures, through experience and constant striving for special features we have developed our thoughts and ideas in order to promote a feeling of well being in the bath.

OUR VISION

A photograph of a worker in a factory setting. The worker is wearing a black t-shirt and grey work gloves. They are operating a large piece of machinery with a teal-colored protective cover. The worker's hands are on a horizontal metal bar. In the background, there are various industrial components, including what appears to be a drill bit and a metal container. The overall scene is brightly lit, suggesting an indoor industrial environment.

... INSTALLAZIONE SENZA SILICONE: IGIENICA, DURATURA ED ESTETICA

SILICON FREE

I nostri box doccia possono essere installati senza silicone grazie ad una guarnizione in pvc resistente all'acqua e ai raggi UV che viene fissata sul profilo verticale interno al muro. Eliminando il silicone, terreno fertile per muffe, germi e batteri, garantiamo così la massima igiene e pulizia.
