THE HAYON COLLECTION

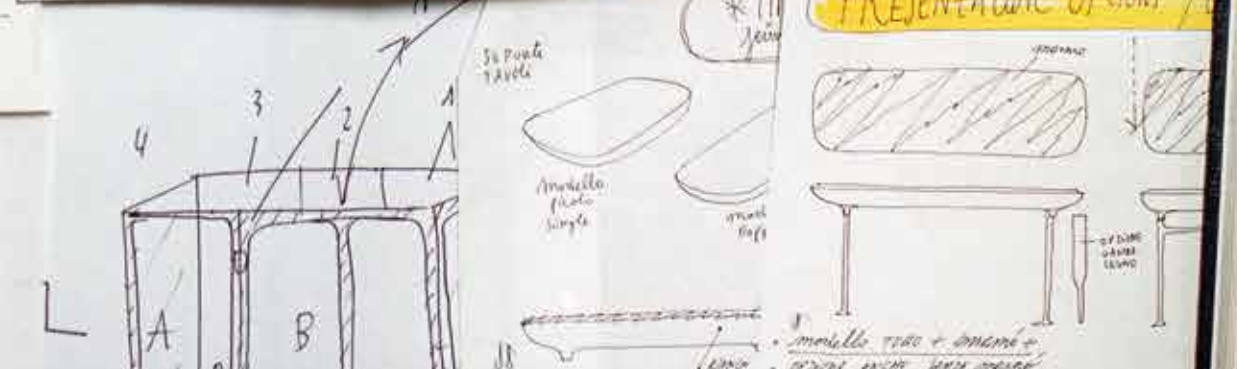

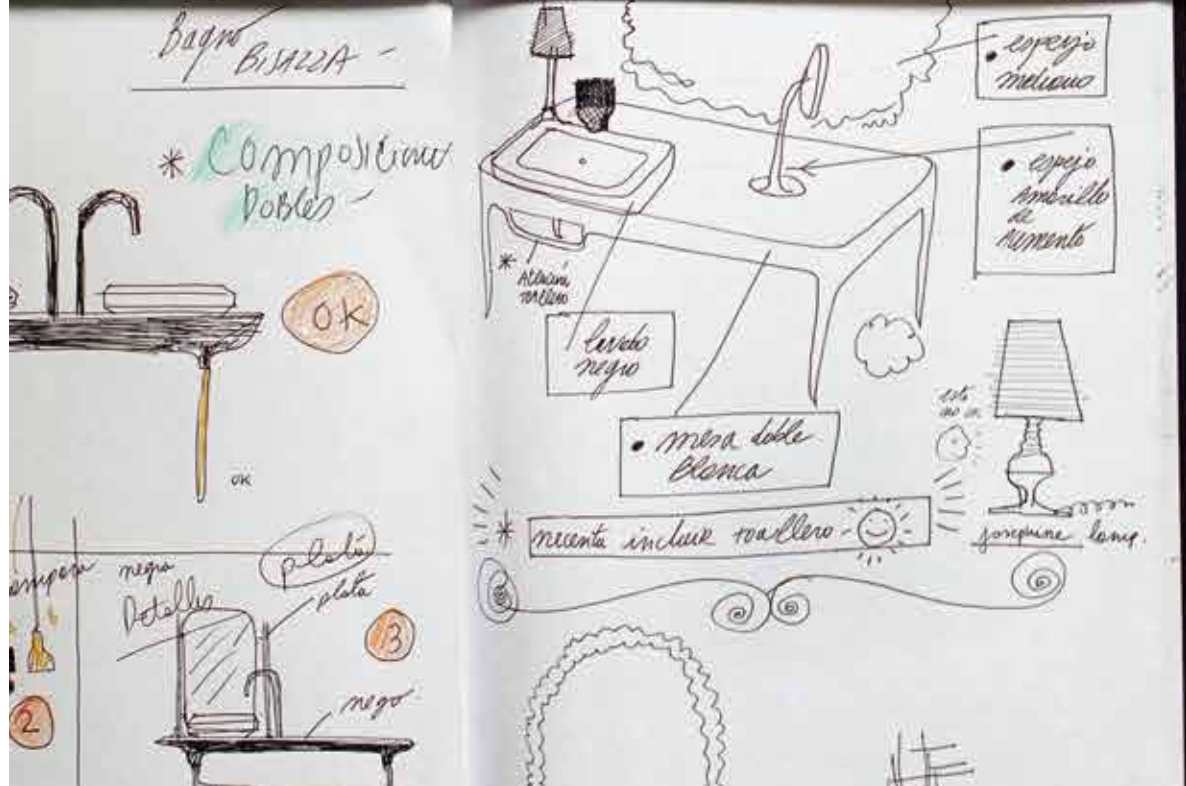

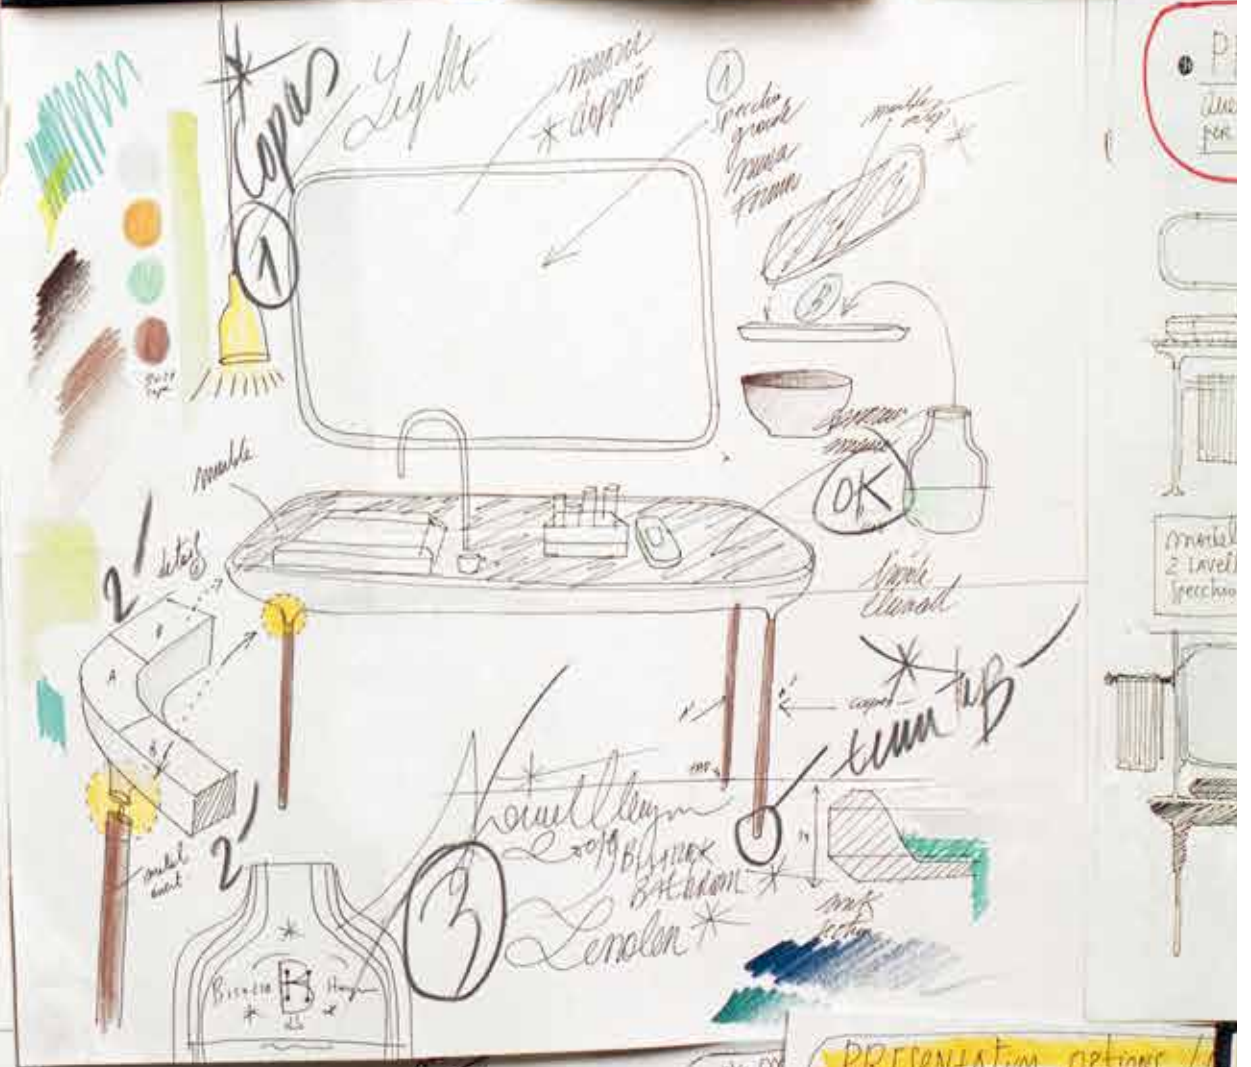

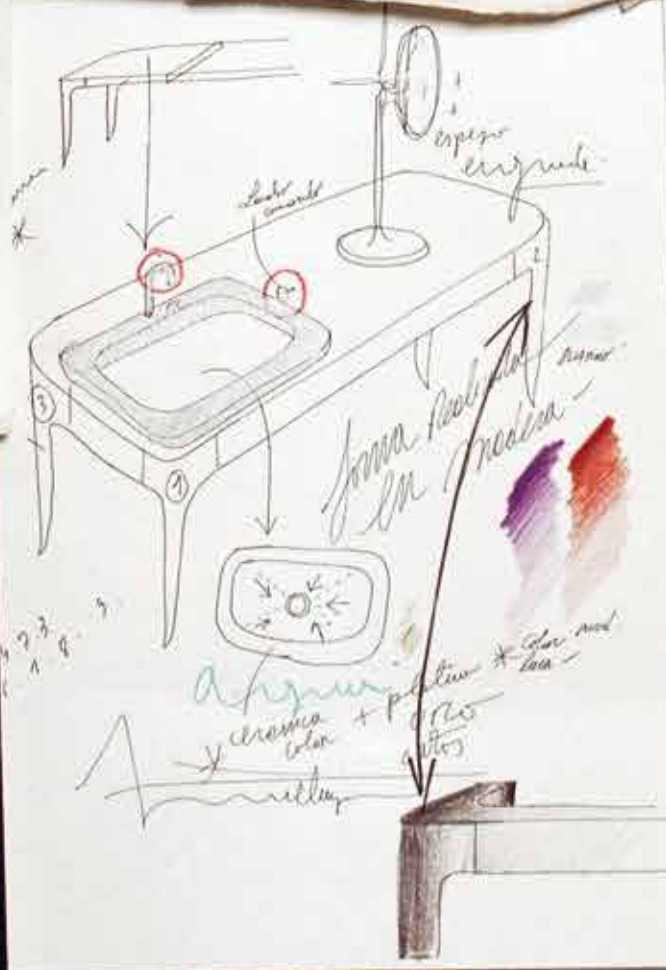

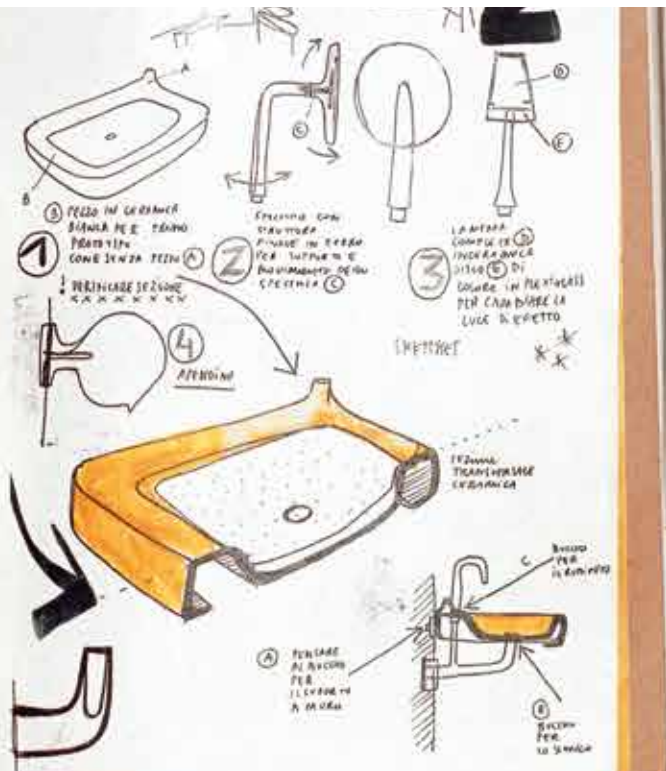

design Jaime Hayon

"La collezione ricorda il glamour degli anni '30 - racconta il designer spagnolo - con un tocco scandinavo e forme femminili. L'eleganza è il tratto distintivo di questa originale collezione. L'ambiente del bagno è il più importante della casa, non deve essere celato, ma piuttosto mostrato. Una stanza da tenere aperta. Il bagno si trasforma in una stanza ricca di charme e stile, con una forte identità"

"The collection recalls the glamour of the 1930s - the Spanish designer says - with a Scandinavian touch and feminine shapes. Elegance is the main trait of this innovative collection. The bathroom is the most important room in the home and it should not be hidden. With this collection, it becomes an area you want to show, a place you can keep open. The bathroom becomes a stylish room, full of charm and style, with a strong identity."

THE WANDERS COLLECTION

design Marcel Wanders

“La collezione deriva il suo concept originario da una mia fantasia, fare il bagno immerso in una saponetta: l’apoteosi del pulito! Ho tenuto dentro di me quest’idea per molto tempo, fino a quando Bisazza non mi ha aiutato a realizzarla. La collezione è poi cresciuta e si è articolata in tre diverse linee, ognuna con una sua estetica ben definita, dall’antico fino all’architettura costruttiva. L’idea di presentare diverse epoche in un’unica collezione deriva da un mio credo: le persone hanno due spinte contrapposte al loro interno, una verso una dimensione eterna dove le cose durano nel tempo; l’altra verso il cambiamento. Nel mio design oscillo e mi muovo tra questi due poli, l’antico e il nuovo, la rassicurazione e l’innovazione. Credo che sia una risposta ad un sentimento molto umano. The Wanders Collection riflette appunto questo dualismo.”

“The original concept for the collection came from a fantasy I had of taking a bath in a bar of soap. The ultimate clean! This idea I held for a long time, before Bisazza helped me realize it. The collection then grew to consist of three components, each with a different aesthetic ranging from new antiques to constructive architecture. This idea to present multiple eras in a single collection comes from my belief that people have two forces inside them: one imagines an eternity where they want things to last and the other edges towards change. I move between these ideas of ancient and new, comfort and novelty. I believe it is very human to do so and so the collection reflects this mentality.”

THE NENDO COLLECTION

design Nendo

“Il nostro obiettivo per questa collezione bagno era quello di creare un’impressione unica e originale, assemblando i diversi elementi, come se fossero “tutti insieme nella stessa vasca”.

La sensazione di condividere il momento del bagno con qualcuno che non conosci, in un locale termale o in un bagno pubblico, è un’usanza importante tipica della cultura giapponese. La nostra collezione bagno per Bisazza vuole esprimere proprio questo concetto.

Il nostro intento è infatti, da una parte, quello di poter mettere insieme elementi diversi, raccogliendoli in un unico contenitore e, dall’altra, quello di creare oggetti diversi moltiplicando lo stesso elemento.

I rubinetti sono inseriti all’interno del lavabo e della vasca da bagno, immersi nell’acqua vicino agli accessori. Un vassoio posto all’interno del lavabo diventa un’isola pensata per gli oggetti che devono rimanere asciutti. Nella console, il lavandino è inserito in una cornice di legno, attraversata dal tubo dell’acqua che, alzandosi dal pavimento, diventa rubinetto...”

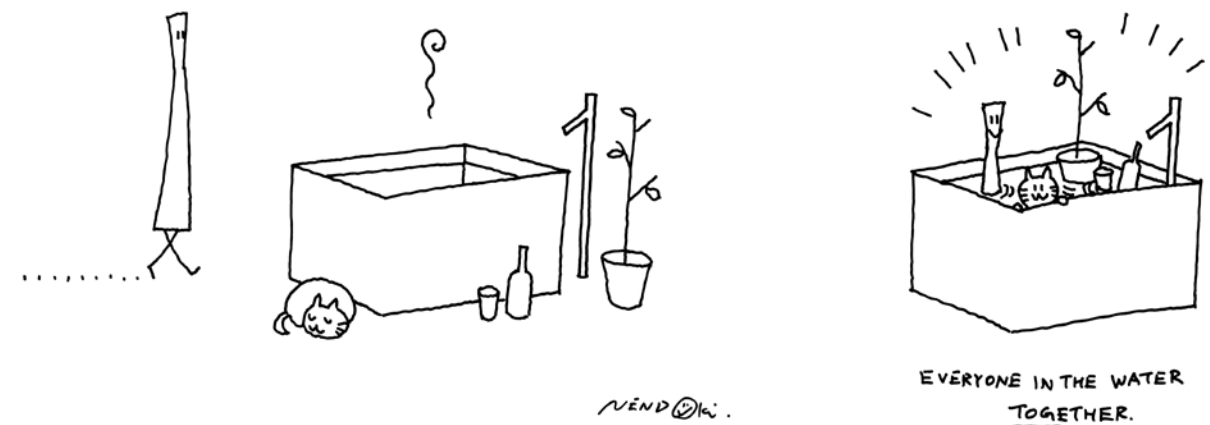

“Our objective for this bathroom collection was to create a strong singular impression by assembling the various elements of a bathroom suite as though they were ‘all in the bath together’.

The feeling of connection that comes from a bath with someone you don’t know at a hot spring or local public bath is an important part of Japanese culture. Our bathroom collection for Bisazza expresses this feeling through its design.

The two key parts of the strategy are details that present the different elements as though they have been stored together in a box, and elements that go together well when used in multiples.

The taps are located inside the washbasin and bathtub, submerged in water alongside accessories.

A tray placed inside the basin becomes an island for objects that need to be kept dry. The washbasin stand encloses the washbasin inside a wood frame, through which the water pipe rises up from the floor, turning into the tap...”

THE MAHDAVI COLLECTION

design India Mahdavi

Specchio / mirror **Wow Blueberry**
Lavabo / washbasin **Slam Blueberry**
Rubinetteria / taps **Bling 1**

"Per la mia seconda collaborazione con Bisazza, ho trasformato il bagno in una bolla di colore e humour: la vasca Plouf, il lavandino Splash e lo specchio Wow sembrano uscire da un albo a fumetti... ricordi d'infanzia.

Antidoto al bianco "clinico" dell'estetica minimalista, le tre varianti colore - mirtillo, fragola e pistacchio - sono un omaggio giocoso alla gourmandise.

Alle pareti, il decoro in mosaico pinstripe fa da contrappunto alle linee curve ed arrotondate dei pezzi. Questa collezione offre una gioiosa esperienza sensoriale, una purificazione attraverso il colore."

"For my second collaboration with Bisazza, I have turned the standard bathroom into a bubble of color and humor: the Plouf bathtub, Splash sink, and Wow mirror seem to pop out of a comic book. A leftover of reinvented childhood..."

But also an antidote to the clinical minimalism of the lab white. The three shades - blueberry, strawberry and pistachio - are a playful tribute to gourmandise.

The pinstripe mosaic backdrop contrasts with the curves and roundness.

It's like a human-scale toy for a sensitive and sensorial experience, a purification through color."

THE HAYON COLLECTION

CONSOLE - TOP LACCATI - MOBILI CONTENITORI - MENSOLE

- Non usare in esterno

- Evitare l'esposizione diretta ai raggi solari per lungo tempo

- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono rovinare la laccatura.

Per la pulizia delle finiture laccate LUCIDE si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniaca, acidi e solventi in genere come acetone. Per la pulizia dei vetri-cristalli, usare un comune detergente per vetri/specchi associato a panni in microfibra o in cotone.

PIANI - MENSOLE - PIATTI DOCCIA IN MARMO

Per la pulizia dei marmi si può utilizzare un detergente liquido, neutro, oppure detergenti specifici per le pietre naturali, non abrasivi, diluiti in acqua tiepida, applicati con panno in microfibra. NON UTILIZZARE MAI PRODOTTI ACIDI O SOLVENTI, in quanto tendono a macchiare o modificare l'aspetto dei materiali.

LAVABI

Per la pulizia delle finiture con metalli preziosi si raccomanda di utilizzare alcool o detergenti per vetro/specchi associati a panni in microfibra o in cotone. Sono ASSOLUTAMENTE DA NON UTILIZZARE prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

GAMBE METALLICHE E PARTICOLARI IN METALLO

Per la pulizia delle gambe con finiture cromate o ramate lavare esclusivamente con acqua e sapone neutro, risciacquare ed asciugare con un panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

LAMPADE E SPECCHI INGRANDITORI IN CERAMICA

Per la pulizia della ceramica si raccomanda di utilizzare alcool o detergenti per vetro/specchi associati a panni in microfibra o in cotone.

Sono ASSOLUTAMENTE DA NON UTILIZZARE prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

SPECCHI

Per la pulizia si raccomanda di utilizzare alcool o detergenti per vetro/specchi associati a panni in microfibra. Sono ASSOLUTAMENTE DA NON UTILIZZARE prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

VASCHE

Per la pulizia delle parti esterne laccate si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniaca, acidi e solventi in genere come acetone. Per la pulizia del catino in acrilico, utilizzare un detergente bagno specifico, applicato con panno in microfibra, NON ABRASIVO.

DOCCE

Per la pulizia delle pareti doccia utilizzare un detergente Bagno specifico, applicato con panno in microfibra, NON ABRASIVO.

RUBINETTERIE - SIFONI - PILETTE

Per una corretta pulizia di rubinetti, sifoni, pilette, lavare esclusivamente con acqua e sapone neutro, risciacquare ed asciugare con un panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

TABLES - LACQUERED TOPS - CABINETS - SHELVES

- Do not use outdoors

- Avoid direct exposure to the sun's rays for long periods of time

- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may damage the lacquering.

For ordinary cleaning of glossy lacquered parts, use only warm water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products). For the glass parts we recommend methylated spirit or special cleaners for glass/mirrors and a microfiber cloth.

VANITY TOPS, SHELVES AND SHOWER TRAYS IN MARBLE

To clean the marble parts use only warm water and a neutral detergent or special cleaners for natural stones and a microfiber cloth. Never use acid or corrosive products as they stain and damage the material.

WASHBASINS

To clean precious metal finishes, we suggest methylated spirit or special cleaners for glass/mirrors and microfibre or cotton cloths.

NEVER EVER use products containing any sort of acid and/or abrasive cloths.

ALUMINIUM LEGS AND DETAILS

To clean the chrome or copper finished legs do use only warm water with a neutral detergent, rinse and dry with a soft cloth. do not use alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.

CERAMIC LIGHT FIXTURES AND MAGNIFYING MIRRORS

When cleaning ceramics we recommend using methylated spirit or special cleaners for glass/mirrors and a microfiber or cotton cloth. NEVER EVER use products containing any sort of acid and/or abrasive cloths.

MIRRORS

For the glass parts we recommend methylated spirit or special cleaners for glass/mirrors and a microfiber cloth. NEVER EVER use products containing any sort of acid and/or abrasive cloths.

BATHTUBS

To clean the external glossy lacquered parts, use a neutral detergent diluted with warm water and a microfiber cloth. NEVER USE ABRASIVE CLEANING PRODUCTS OR SPONGES OR SHARP TOOLS. Please avoid bleach or corrosive lotions (acetone, anti-lime scale products). To clean the acrylic basin please use a specific detergent and a microfiber cloth, NOT ABRASIVE.

SHOWER WALLS

To clean the shower walls please use a specific detergent and a microfiber cloth, NOT ABRASIVE.

TAPS - SIPHONS - WASTES

To clean mixers, wastes and siphons do use only warm water with a neutral detergent, rinse and dry with a soft cloth. Do not use alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.

THE WANDERS COLLECTION

CONSOLE - TOP LACCATI - MOBILI CONTENITORI - MENSOLE

- Non usare in esterno

- Evitare l'esposizione diretta ai raggi solari per lungo tempo

- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono rovinare la laccatura.

Per la pulizia delle finiture laccate LUCIDE e OPACHE si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniaca, acidi e solventi in genere come acetone. Per la pulizia dei vetri-cristalli, usare un comune detergente per vetri/specchi associato a panni in microfibra o in cotone.

PIANI IN VETRO

Per la pulizia dei piani in vetro si può utilizzare un detergente liquido, neutro, diluito in acqua tiepida, oppure detergenti specifici per i vetri-specchi (es. Vetril), non abrasivi, applicati con panno in microfibra. NON UTILIZZARE MAI PRODOTTI ACIDI O SOLVENTI, in quanto potrebbero rovinare la superficie o la verniciatura.

LAVABI

Per la pulizia della ceramica si raccomanda di utilizzare alcool o detergenti bagno specifici, associati a panni in microfibra o in cotone.

Si sconsiglia l'uso di prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

PARTICOLARI IN METALLO

Per la pulizia di parti e componenti metalliche cromate o verniciate, utilizzare esclusivamente acqua e sapone neutro, risciacquare ed asciugare con un panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

VASCHE

Per la pulizia della vasca si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniaca, acidi e solventi in genere come acetone.

RUBINETTERIE - SIFONI - PILETTE

For ordinary cleaning of glossy or matte lacquered parts, use warm water and a neutral detergent with a microfiber cloth; do not use abrasive cleaning products or sponges or sharp tools. Please avoid bleach or corrosive lotions (acetone, anti-lime scale products). For the glass parts we recommend methylated spirit or special cleaners for glass/mirrors and a microfiber cloth.

GLASS TOPS

To clean the glass parts use warm water and a neutral detergent or special cleaners for glass/mirrors and a microfiber cloth. NEVER USE CORROSIVE LOTIONS OR SOLVENTS as they can damage the surface or the lacquering.

WASHBASINS

When cleaning ceramics we recommend using methylated spirit or special cleaners for bath and a microfiber or cotton cloth. NEVER EVER use products containing any sort of acid and/or abrasive cloths.

METALLIC PARTS

To clean the chrome finished and metallic parts do use only warm water with a neutral detergent, rinse and dry with a soft cloth. Do not use alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.

THE NENDO COLLECTION

MANUTENZIONE SPECIALE

LAVABI IN LEGNO

- Non posizionare vicino a fonti di calore
- Non usare in esterno
- Evitare l'esposizione diretta ai raggi solari per lungo tempo
- Usare acqua miscelata, temperatura massima 60°C (140°F)
- Utilizzare il piattino in ceramica in dotazione come portasapone per evitare il contatto continuo di qualsiasi tipo di sapone anche neutro con il legno
- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono essere assorbiti dal legno.
- Evitare il ristagno di acqua: la piletta in dotazione è a scarico libero per garantire un costante deflusso dell'acqua. La staffa a corredo è munita di regolazioni per la perfetta ‚messa in bolla‘. Una installazione non corretta potrebbe provocare ristagni d'acqua all'interno del catino e a lungo andare depositi di calcare e MUFFE. Bisazza declina ogni responsabilità in caso di installazione NON CORRETTA del lavabo o in caso di sostituzione del sifone e della piletta con prodotti non originali.

IMPORTANTE: un utilizzo continuo del prodotto in legno garantisce le condizioni di temperatura e umidità idonee a preservarlo nel tempo da eventuali danni; piccole crepe o leggere fessurazioni superficiali potrebbero comparire nel tempo con l'utilizzo, ma in nessun caso precludono l'utilizzo del prodotto o la tenuta all'acqua.

- Non lasciare il lavabo inutilizzato per lunghi periodi.

Per la pulizia ordinaria, usare solo acqua e detergenti neutri con panni in microfibra. Non utilizzare prodotti abrasivi o lozioni corrosive (acetone, anticalcare).

Ogni 6-12 mesi, provvedere ad effettuare una manutenzione straordinaria, utilizzando il kit di manutenzione fornito a corredo. Particolare attenzione va data alle zone a diretto contatto con l'acqua (fondo e pareti interne al catino).

Laddove fosse necessario (al comparire di escrescenze, piccole crepe, depositi di sporco duri da rimuovere...), provvedere al ripristino del film protettivo con la vernice all'acqua fornita nel kit, seguendo attentamente le istruzioni in esso contenute.

VASCA

- Non posizionare vicino a fonti di calore
- Non usare in esterno
- Evitare l'esposizione diretta ai raggi solari per lungo tempo
- Usare acqua miscelata, temperatura massima 60°C (140°F)
- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono essere assorbiti dal legno.
- Evitare il ristagno di acqua: la vasca è dotata di piedini di regolazione per la perfetta ‚messa in bolla‘. Una installazione non corretta potrebbe provocare ristagni d'acqua all'interno del catino e a lungo andare depositi di calcare e MUFFE. Bisazza declina ogni responsabilità in caso di installazione NON CORRETTA.

IMPORTANTE: un utilizzo continuo del prodotto in legno garantisce le condizioni di temperatura e umidità idonee a preservarlo nel tempo da eventuali danni; piccole crepe o leggere fessurazioni superficiali potrebbero comparire nel tempo con l'utilizzo, ma in nessun caso precludono l'utilizzo del prodotto o la tenuta all'acqua.

- Non lasciare la vasca inutilizzata per lunghi periodi (oltre 2 mesi).
- Svuotare e sciacquare il prodotto dopo ogni singolo utilizzo (utilizzo massimo 2-3 ore)

Per la pulizia ordinaria, usare solo acqua e detergenti neutri con panni in microfibra. Non utilizzare prodotti abrasivi o lozioni corrosive (acetone, anticalcare).

Ogni 6-12 mesi, provvedere ad effettuare una manutenzione straordinaria, utilizzando il kit di manutenzione fornito a corredo. Particolare attenzione va data alle zone a diretto contatto con l'acqua (fondo e pareti interne al catino).

Laddove fosse necessario (al comparire di escrescenze, piccole crepe, depositi di sporco duri da rimuovere...), provvedere al ripristino del film protettivo con la vernice all'acqua fornita nel kit, seguendo attentamente le istruzioni in esso contenute.

SPECCHI - CABINET - SGABELLI - MENSOLE - PORTASALVIETTE

- Non usare in esterno
- Evitare l'esposizione diretta ai raggi solari per lungo tempo
- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono essere assorbiti dal legno.

Per la pulizia ordinaria, usare solo acqua e detergenti neutri con panni in microfibra. Non utilizzare prodotti abrasivi o lozioni corrosive (acetone, anticalcare).

TOP LAVABO IN CRISTALPLANT®

- Non usare in esterno
 - Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono macchiare il legno (che possono essere assorbiti dal legno).
 - La piletta in dotazione è a scarico libero per garantire un costante deflusso dell'acqua. Bisazza declina ogni responsabilità in caso di installazione del lavabo con sifone e piletta non originali.
- Per la pulizia ordinaria del legno, usare solo acqua e detergenti neutri; non utilizzare prodotti abrasivi o lozioni corrosive (acetone, anticalcare).
Per la pulizia ordinaria del Cristalplant®, usare un panno umido imbevuto dei comuni detergenti, avendo cura di risciacquare bene la superficie.
Per la pulizia straordinaria del Cristalplant®, utilizzare la spugnetta abrasiva in dotazione e seguire le indicazioni contenute nel kit di manutenzione.

LAVABO IN MINERALMARMO®

- Non usare in esterno
- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detergenti anche neutri concentrati che possono macchiare il legno (che possono essere assorbiti dal legno).
- La piletta in dotazione è a scarico libero per garantire un costante deflusso dell'acqua. Bisazza declina ogni responsabilità in caso di installazione del lavabo con sifone e piletta non originali.

Prendersi cura del Mineralmarmo® è facile e veloce. Per rimuovere la maggior parte di macchie, il calcare e lo sporco che normalmente si depositano sulla superficie, è sufficiente pulire con un panno o una spugna non abrasiva umida e comuni detergenti non abrasivi (meglio in gel). Al termine della pulizia risciacquare bene la superficie.

Per la pulizia evitare l'uso di detergenti e spugne abrasive. Non usare raschietti metallici. Questo prodotto ha una buona resistenza al calore, tuttavia evitare di appoggiare sulla superficie oggetti roventi o di scolare liquidi bollenti. Si sconsiglia l'uso di solventi chimici aggressivi quali acetone, trielina, solventi, acidi e basi forti. Alcune sostanze come inchiostro, cosmetici e tinture possono rilasciare coloranti sulla superficie: evitare che vengano a contatto con la superficie. Non appoggiare sigarette accese, non tagliare direttamente sulla superficie.

Per la pulizia ordinaria del legno, usare solo acqua e detergenti neutri; non utilizzare prodotti abrasivi o lozioni corrosive (acetone, anticalcare).

LAMPADE E LAMPADARI

Per una corretta pulizia di Lampade e Lampadari, utilizzare esclusivamente panni in microfibra inumiditi con acqua ed eventualmente sapone neutro diluito, ed asciugare con un panno morbido. Evitare assolutamente l'impiego di acqua corrente, alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

RUBINETTERIE - SIFONI - PILETTE

Per una corretta pulizia di rubinetti, sifoni, pilette, lavare esclusivamente con acqua e sapone neutro, risciacquare ed asciugare con un panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

SPECIAL MAINTENANCE

WOODEN SINKS

- Do not position close to heat sources
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Use with blended hot and cold water at a maximum temperature of 60°C (140°F)
- Use the ceramic soap dish provided to avoid ongoing contact of any kind of soap, however neutral, with the wood
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
- Do not leave stagnant water in the sink: the drain is open, without a stopper, to ensure a constant flow of water. The bracket provided may be adjusted to ensure perfectly level installation. Incorrect installation may cause water to stagnate within the basin and over time may result in deposits of lime scale and MOLD. Bisazza shall not be held liable for any INCORRECT installation of the sink or for use of a drain and drain trap different from the original ones.

IMPORTANT: continuous use of the wooden product guarantees the best temperature and humidity conditions for preserving it from damage over time; small cracks or slight surface splitting might appear over time, which does not in any case whatsoever preclude use of the product or the water seal. Do not leave the sink unused for prolonged periods.

For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

Every 6-12 months, use the kit provided for special maintenance, paying particular attention to areas in direct contact with water (inner walls and bottom of the basin).

Wherever necessary (with the appearance of growths, small cracks, stubborn dirt deposits...), restore the protective film using the water-based paint supplied with the kit and carefully following the instructions provided.

BATHTUB

- Do not position close to heat sources
- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Use with blended hot and cold water at a maximum temperature of 60°C (140°F)
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood
- Do not leave stagnant water: the tub is provided with adjustable feet to ensure perfectly level installation. Incorrect installation may cause water to stagnate within the basin and over time may result in deposits of lime scale and MOLD. Bisazza shall not be held liable for any INCORRECT installation of the tub.

IMPORTANT: continuous use of the wooden product guarantees the best temperature and humidity conditions for preserving it from damage over time; small cracks or slight surface splitting might appear over time, which does not in any case whatsoever preclude use of the product or the water seal. Do not leave the tub unused for prolonged periods (more than 2 months).

Empty and rinse the tub after each use (use for a maximum of 2-3 hours).

For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

Every 6-12 months, use the kit provided for special maintenance, paying particular attention to areas in direct contact with water (inner walls and bottom of the basin).

Wherever necessary (with the appearance of growths, small cracks, stubborn dirt deposits...), restore the protective film using the water-based paint supplied with the kit and carefully following the instructions provided.

MIRRORS - CABINETS - STOOL - SHELVES - TOWEL RACKS

- Do not use outdoors
- Avoid direct exposure to the sun's rays for long periods of time
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may be absorbed by the wood

For ordinary cleaning, use only neutral soap and water. Do not use abrasive products or corrosive lotions (acetone, anti-lime scale products).

CRISTALPLANT® SINK COUNTERTOP

- Do not use outdoors
 - Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may stain the wood (may be absorbed by the wood).
 - The drain provided is open, without a stopper, to ensure a constant flow of water. Bisazza shall not be held liable for damage if the sink is installed with a drain and drain trap different from the original ones.
- For ordinary cleaning of wood, use only water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products).
- For ordinary cleaning of Cristalplant®, use a soft cloth dampened with an ordinary cleaning product, and be sure to rinse the surface well afterwards.
For in-depth cleaning of Cristalplant®, use the abrasive pad provided and follow the instructions in the maintenance kit.

MINERALMARMO® WASHBASIN

- Do not use outdoors
- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may stain the wood (may be absorbed by the wood).

-The drain provided is open, without a stopper, to ensure a constant flow of water. Bisazza shall not be held liable for damage if the sink is installed with a drain and drain trap different from the original ones.

To remove most stains, scale and grime that normally deposit on the surface, just clean with a cloth or moist non-abrasive sponge and common non-abrasive detergents (better yet if gel). Thoroughly rinse the surface after cleaning.

Avoid using abrasive detergents and sponges when cleaning. Do not use metallic scrapers. This product has good heat resistance, however avoid setting hot objects on the surface or emptying boiling liquids.

The use of aggressive chemical solvents such as acetone, trichloroethylene, solvents, acids and strong bases is advised against. Some substances, like ink, cosmetics and dyes, may release colouring agents, so prevent them from coming into contact with the surface. Do not set lit cigarettes on the surface, and do not directly cut anything directly on the surface.

For ordinary cleaning of wood, use only water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products).

LAMPS AND CHANDELIERS

To clean the lamps and chandeliers do use only microfiber cloths dampen with water and possibly a diluted neutral detergent, then dry with a soft cloth. Do not use running water, alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.

TAPS - SIPHONS - WASTES

To clean mixers, wastes and siphons do use only warm water with a neutral detergent, rinse and dry with a soft cloth. Do not use alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.

THE MAHDAVI COLLECTION

LAVABI

- Non usare in esterno

- Evitare l'esposizione diretta ai raggi solari per lungo tempo

- Evitare il contatto prolungato con lozioni, prodotti cosmetici o detersivi anche neutri concentrati che possono rovinare la laccatura

Per la pulizia delle finiture laccate LUCIDE si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniac, acidi e solventi in genere come acetone.

Per la pulizia della ceramica si raccomanda di utilizzare alcool o detersivi bagno specifici, associati a panni in microfibra o in cotone.

Si sconsiglia l'uso di prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

SPECCHI

Per la pulizia si raccomanda di utilizzare alcool o detersivi per vetro/specchi associati a panni in microfibra. Sono ASSOLUTAMENTE DA NON UTILIZZARE prodotti contenenti acidi di qualsiasi natura e/o spugne e panni abrasivi.

VASCHE

Per la pulizia della vasca si può utilizzare un detergente liquido, neutro, non abrasivo, diluito in acqua tiepida, applicato con panno in microfibra. NON UTILIZZARE MAI PRODOTTI IN POLVERE, ABRASIVI, SPUGNETTE ABRASIVE O UTENSILI APPUNTITI. Assolutamente da evitare l'uso di candeggina, ammoniac, acidi e solventi in genere come acetone.

RUBINETTERIE - SIFONI - PILETTE

Per una corretta pulizia di rubinetti, sifoni, pilette, lavare esclusivamente con acqua e sapone neutro, risciacquare ed asciugare con un panno morbido. Evitare assolutamente l'impiego di alcool, solventi, detersivi contenenti sostanze corrosive o acide (acido cloridrico, formico, acetico, fosforico), spugne abrasive e tamponi con fili metallici.

WASHBASINS

- Do not use outdoors

- Avoid direct exposure to the sun's rays for long periods of time

- Avoid prolonged contact with lotions, cosmetics or concentrated detergents, however neutral, as they may damage the lacquering

For ordinary cleaning of glossy lacquered parts, use only warm water and a neutral detergent; do not use abrasive cleaning products or corrosive lotions (acetone, anti-lime scale products).

When cleaning ceramics we recommend using methylated spirit or special cleaners for bath and a microfiber or cotton cloth. NEVER EVER use products containing any sort of acid and/or abrasive cloths.

MIRRORS

For the glass parts we recommend methylated spirit or special cleaners for glass/mirrors and a microfiber cloth. NEVER EVER use products containing any sort of acid and/or abrasive cloths.

BATHTUBS

For ordinary cleaning use warm water and a neutral detergent with a microfiber cloth; NEVER USE ABRASIVE CLEANING PRODUCTS OR SPONGES OR SHARPTOOLS. Please avoid bleach or corrosive lotions (acetone, anti-lime scale products).

TAPS - SIPHONS - WASTES

To clean mixers, wastes and siphons do use only warm water with a neutral detergent, rinse and dry with a soft cloth. Do not use alcohol, solvents, abrasive cleaning products or corrosive lotions (hydrochloric, formic, acetic or phosphoric acid), abrasive sponges or buffer with metal strings.
